 - Pave boat landing area (and new parking areas if funding available)
 - Build 24'x36' shelter (w/landscapped parking and access)
 - Add security lighting
 - New park sign

December 2018

Town of Lenroot Annual News Letter

We purchased a new dump truck with snow plow and wing in February and a new tractor and boom mower in June. This equipment replaces older ones that were requiring significant repairs.

2018 road projects completed were the southern end of Mosquito Brook Road-gravel base and blacktop, all of Ewig Road-gravel base and blacktop, and the crushing of 20,000 yards of gravel.

The Town of Lenroot and Sawyer County have received a grant from the Department of Natural Resources to develop a park adjacent to the Nelson Lake dam. A plan developed by retired landscape architect Fred Goold calls for a new toilet, picnic shelter, well, and blacktop. The shelter and black topping are the major items that are left to complete in 2019. Financial support for this project is being supplied by the Town of Lenroot, the Nelson Lake Association, and the Nelson Lake Resort Owners Association and Sawyer County.

2019 road development projects will be reduced next summer due to reconstruction of Highway 63 which will limit access to the town hall and gravel pit. The list of roads to be worked on will be taken up in January and will include several roads for resurfacing and crack sealing.

Information about township meetings can be viewed on the town web page at townoflenroot.net.
